Come che al funzione un ordin

01

Scegli un servizi

Sielzi de liste o domandâ al assistent. Il presit e i tiermins a son su la pagjine prime di fevelâ cun nissun.

02

Aprovâ il cuadri

Il prin stadi al è un scheme scrit di ce che al sarà costruît. Chest al è l'unic stadi dulà che lis revisions a son includudis.

03

O costruìn e o lustrìn

Si segui il progrès suntun leam di anteprime. La lustradure dal dissen e rifinìs il cuadri aprovât e no lu rimplace.

04

Paiâ in mût complet, daspò ricevi

I file a son consegnâts e il hosting al va in direte cuant che il salt al rive a zero. USDT e USDC a son acetâts.

Lis regulis

Paiât in mût complet prin de consegne
Nissun sît al è consegnât e nissun hosting al è cjapât sù fintant che l'ordin nol è paiât dal dut.

Lis revisions a finissin al stadi 1
Cambiâ il cuadri come che tu volis prin che al sedi aprovât. Une revision dopo di chê e conte come un gnûf servizi.

Il cost dal domini al è separât
I presits a no cjapin dentri mai il domini. Tu lu regjistris cul to non, cussì al reste il to.

Presits di partence. Il cost dal domini nol è cjapât dentri. Pagament in USDT o USDC. Il paiament complet al è dovût prin de consegne.
