Kon paano nagatrabaho ang isa ka order

01

Magpili sang serbisyo

Pilia gikan sa listahan o pangutan-a ang kabulig. Ang presyo kag mga kondisyon yara sa pahina antes ka maghambal sa bisan sin-o.

02

Aprobahan ang gambalay

Ang stage 1 isa ka nasulat nga outline sang kon ano ang patindugon. Amo lang ini ang hugna nga ginalakip ang mga rebisyon.

03

Nagatukod kami kag nagapahining

Ginasunod mo ang pag-uswag sa isa ka link sang preview. Ang desinyo nga polish nagapino sang gin-aprubahan nga framework kag wala nagabulos sini.

04

Magbayad sing bug-os, dayon batuna

Ang mga file ginahatag kag ang pag-host naga-live kon ang balanse maglab-ot sa zero. Ang USDT kag USDC ginabaton.

Ang mga pagsulundan

Ginbayaran sing bug-os antes ang pagdul-ong
Wala sing site nga ginahatag kag wala sing hosting nga gina-on tubtob nga ang order mabayaran sing bug-os.

Ang mga pagbag-o nagatapos sa yugto 1
Bag-uha ang framework suno sa imo luyag antes ini aprobahan. Ang overhaul pagkatapos sini nagaisip nga isa ka bag-o nga serbisyo.

Ang gasto sa domain separado
Ang mga presyo wala gid nagalakip sang domain. Ginarehistro mo ini sa imo kaugalingon nga ngalan, gani nagapabilin ini nga imo.

Pagsugod sa mga presyo. Wala nalakip ang gasto sa domain. Pagbayad sa USDT o USDC. Ang bug-os nga pagbayad dapat bayaran antes ang paghatag. Kinaandan nga mga termino
